

## How to Make my Snowman

By: Jayden 17A

1. Make your background a light blue (#66ffff).
2. Draw a white circle about 2 inches in diameter touching the bottom of the page.
3. Draw a smaller white circle that measures about  $1\frac{1}{4}$  inches in diameter then set it on top of your bigger circle.
4. Make three small black circles about the size of an eraser on a pencil.
5. Set one of the black circles in the middle of the biggest circle then another one about  $\frac{1}{2}$  an inch above it and the last one  $\frac{1}{2}$  an inch below it.
6. Now you are going to make a black top hat. First get a line that has a line size of 9 then make it about  $1\frac{1}{4}$  inches long then set it on top of the smaller white ball.
7. Then make a black rectangle about  $\frac{3}{4}$  inches wide and  $\frac{1}{2}$  an inch tall. And place it on top of the black line that you just drew in the middle of it.
8. Go to shapes and pick out the line again and make it yellow (#ffff00). Then draw it where the black line and the black rectangle meet then draw it to where its length is about  $\frac{3}{4}$  inches long.
9. Now you are going to make the face. First go to shapes and pick out the triangular shape and make it orange (ff6600). Then start at the center of the face and drag it out to the left and then squash it to where it measures about  $\frac{1}{2}$  a centimeter tall.
10. Now for the black eyes, go to the pencil and make the line size to where it is to the number 3 then about  $\frac{1}{4}$  of an inch above the nose draw a circular shape to where it resembles an eyeball after that draw another circle about the same size but  $\frac{1}{4}$  of an inch away from the first one.
11. Now for the mouth draw a circle that is about the same size as the eyeball and place the first one about  $\frac{1}{4}$  of an inch below the nose. After that draw five more the same size and place two of them on the left side and three of them on the right in an upward motion.
12. Now you are going to make a scarf. First get a line that has a line size of 13 and then start to drag from where the small white circle and the big white circle meet and make the line about 1 inch long.
13. Then use that same line size and starting from the right side of the line (that you just made) go diagonally right so your line measures about  $\frac{1}{2}$  an inch long.
14. Now make your line size 6 and starting from the line that you just made (in direction 13) make a line starting at the center of the end of the line that you just made and drag it to where it measures about  $\frac{1}{4}$  of an inch. Then make one line coming out of the corner of the line (that you made in direction 13) that measures  $\frac{1}{4}$  of an inch and on the other corner do the same.
15. Now for the arms go to the pencil and make the line size 9 and the color brown and start drawing your line  $\frac{1}{4}$  of an inch on the right side below the scarf starting on the edge of the white circle. Make this arm as straight as you can but it doesn't have to be perfect. Make your line  $1\frac{1}{4}$  inches long (and that includes the middle finger). Now for the other two fingers start  $\frac{1}{4}$  of an inch down on the line that you just made and going up make a finger that is  $\frac{1}{2}$  an inch long and going down draw another finger the same size. For the other arm do the exact same.
